EDUCATION

Bachelor of Science in Computer Science

University of Houston – Natural Science & Mathematics

Minor in Mathematic

Expected Graduate: December 2021

GPA: 3.949/4.0

RELEVANT COURSEWORK

Introduction to Networking, Data Science and Machine Learning, Entrepreneurship for computer science, Introduction to interactive game development, Software designs.

ACADEMIC PROJECTS

Small Business Web Application | ASP.NET Framework, SQL, HTML, CSS | Visual Studio Code | Summer 2021

- Developed a web application for small businesses following the MVC Architecture and object-oriented programming to maintain reusability and clear code for future improvements.
- Provided the opportunity for small business to manage their inventory, sales, and other aspects of their marketing.

Fibonacci Code Generator | C++, Multithreaded Processing, Communication Sockets | Spring 2021

- Two programs that use inter-process communication mechanisms in UNIX using multi-threaded sockets to communicate.
- Client program received the information from a user then send them using child thread sockets to the server program.
- Server would then return decoded values to the client, so clients could break the codes on their local machine.

DVD Collection Desktop Application | C#, SQL | Visual Studio | Spring 2020

- Developed a desktop application following object-oriented programming.
- This application converts a text file provided by user and divide the information to the specific record to be able to store in database for easy access.
- The application provides other functionalities such as add, remove, edit, and search based on specific record.
